

Rishikesh Pal

Lead Backend Engineer | Node.js | AWS | Distributed Systems | Microservices

Mumbai, India | +91 9702330257 | palrishikesh007@gmail.com | linkedin.com/in/rishikeshpal

Professional Summary

Lead Backend Engineer with 10+ years of experience designing scalable distributed systems using Node.js, AWS, MongoDB, Kafka, and microservices. Experienced in backend architecture, high-performance REST APIs, event-driven systems, cloud-native applications, and engineering leadership. Led teams of up to 8 developers, mentored junior engineers, drove code quality, and delivered scalable production systems for fintech, gaming, healthcare, and enterprise applications.

Technical Skills

- Languages: JavaScript, TypeScript, PHP.
- Backend: Node.js, Express.js, Microservices, Event-Driven Architecture, Rest APIs, Caching (Redis).
- Streaming: Apache Kafka
- Frontend: HTML, CSS, React.js, Micro frontend architecture.
- Cloud: AWS (Lambda, API Gateway, S3, SQS, SNS, SES), CI/CD.
- Databases: MongoDB, MySQL.
- Testing: Playwright, Mocha, Chai

Professional Experience

Synechron – Lead Technology (Nov 2024 – Mar 2026)

- Designed scalable backend architecture using Node.js, AWS, Kafka, and Redis.
- Developed high-throughput REST APIs for financial transaction processing.
- Improved API response time using Redis caching.
- Built ReactJS frontend in Micro frontend architecture.
- Mentored junior developers through design reviews and code reviews.
- Worked closely with QA and DevOps teams to improve deployment quality.
- Implemented event-driven architecture using Kafka.
- Built an automation framework using Playwright to reduce regression effort.

Quinnox – Lead Consultant (Aug 2024 – Nov 2024)

- Modernized legacy systems into scalable Node.js services.
- Improved maintainability and performance.
- Collaborated with distributed teams.

Metrics Numero – Senior Software Engineer (Sep 2022 – Aug 2024)

- Led a team of 8 software engineers.
- Designed scalable backend APIs using Node.js.
- Improved application performance by 30% through backend optimization.

- Built ReactJS frontend.
- Conducted architecture discussions and sprint planning.
- Mentored junior engineers and reviewed pull requests.
- Collaborated with QA teams to automate critical business workflows.

PlayerzPot – Software Engineer (Apr 2022 – Sep 2022)

- Developed backend services for real-time applications
- Optimized performance and data processing

Unico Connect – Software Developer (Oct 2019 – Feb 2022)

- Built scalable backend systems, Improve Search API by 40% in DB and Application level.
- Owned backend delivery from design to deployment.
- Managed AWS infrastructure and CI/CD pipelines.
- Coordinated cross-functional teams.
- Mentored four junior developers.
- Implemented deployment automation and API validation.
- Started maintaining the List of API with Swagger Documentation.

RelifeMS (Penguins App) – LAMP Developer (Jul 2018 – Oct 2019)

- Developed Diagnosis module project using Laravel framework.
- Wrote clear, clean code for various projects.
- Collaborated with QA and UX teams.

ColoredWeb – Web Developer (Nov 2015 – Jul 2018)

- Developed responsive websites and maintained applications
- Created a Mobile Responsive User Experience.
- Wrote custom HTML, CSS, JavaScript and PHP for existing websites.
- Maintained client websites with timely updates.

Key Projects

- ENBD – Built scalable Rest APIs using Node.js, implemented event-driven architecture with Kafka, added caching using Redis for performance optimization, ReactJS for frontend and developed Unit & Automation testing using Playwright.
- Goalster – Developed full-stack app using Node.js, React, AWS serverless architecture
- PlayerzPot – Built high-performance backend handling real-time data
- CricStox – Managed APIs and AWS infrastructure
- StayVista – Developed scalable booking platform
- RelifeMS – Built healthcare modules and backend systems

Education MSc IT – Mumbai University | 2017 – 2019
